Technical Skills & Competencies

- **Operating Systems:** Windows 7/8/10/11, Linux
- **ICT Support:** Hardware & Software Installation, Configuration, Troubleshooting
- **Healthcare Systems:** NHIF Billing System, Electronic Health Records (EHR/EMR), Patient Records Management
- **Networking:** LAN/WAN, TCP/IP, Wi-Fi Configuration, Structured Cabling, Network Troubleshooting
- **Cybersecurity:** Access Control, Antivirus Management, Web Security, Cryptography, Ethical Hacking Fundamentals

Professional Summary

Experienced ICT Support Professional with over **4 years** of progressive experience delivering ICT support across healthcare, corporate, and academic environments. Skilled in NHIF billing systems, electronic medical records (EMR), health data digitization, Wi-Fi network deployment, hardware and software support, end-user support, and ICT training.

Holds a Diploma in Information and Communication Technology from The Kisumu National Polytechnic, complemented by 10+ professional certifications in cybersecurity, ethical hacking, Python programming, artificial intelligence, and networking.

Proven ability to manage ICT operations independently and collaboratively, ensuring system reliability, data integrity, information security, and efficient service delivery across healthcare, government, NGO, corporate, and private sector organizations.

Education

Jan 2022 – Nov 2025
Diploma in Information and Communication Technology
The Kisumu National Polytechnic | Kisumu, Kenya

Jan 2013 – Nov 2016
Kenya Certificate of Secondary Education (KCSE)
Gina Mixed Secondary School

Jan 2005 – Nov 2012
Kenya Certificate of Primary Education (KCPE)
Anding'o Pala Primary School

Experience

June 2026 – To date

ICT Technician | St. Joseph's Technical Institute for the Deaf, Nyang'oma

- Provide day-to-day technical support to staff and students, troubleshooting hardware, software, and operating system problems to keep classes and office work running.
- Install, configure, and maintain computers, printers, and other ICT equipment.
- Maintain the institute's LAN and Wi-Fi, troubleshooting connectivity issues and keeping the network stable.

- **Data Management:** Health Data Digitization, Data Backup & Recovery, Records Management
- **Programming:** Python Fundamentals, Basic Web Technologies
- **Productivity Tools:** Microsoft Word, Excel, PowerPoint, Power BI
- **Training & User Support:** ICT Staff Training, Digital Literacy, Android Device Support
- **Documentation & Asset Management:** ICT Asset Tracking, Service Documentation, Technical Reporting

Projects & ICT Infrastructures

Systems Development

- **Sports Management System:** Developed a system for managing teams, player records, scheduling, and performance tracking using a structured database.
- **Hostel Management System:** Built a system to automate room allocation, student registration, and occupancy tracking through centralized data management.

ICT Infrastructure & System Setups

- **Office Network Setup (LAN):** Configured LAN infrastructure including routers, switches, IP addressing, and internet connectivity.
- **Wireless Network Deployment:** Installed and secured Wi-Fi networks with optimized coverage and WPA2/WPA3 encryption.
- **Healthcare ICT System Support:** Set up and maintained hospital systems, including software and networked devices.
- **Basic Cybersecurity Implementation:** Applied security measures such as antivirus, firewalls, and access control.
- Apply antivirus protection and user access controls to keep the Institute's computers and data secure.
- Carry out routine maintenance, system updates, and data backups to reduce downtime and protect important files.
- Keep ICT inventory records and document technical issues and fixes.
- Support digital literacy and help staff and students make good use of the institute's ICT resources.

Jan 2025 – Mar 2025 (3 Months)
ICT Support Technician (Industrial Attachment) | Sony Sugar Company Ltd

- Deployed as an embedded ICT Support Technician, providing end-to-end technical support across multiple departments in a large-scale agro-industrial organization.
- Diagnosed and resolved hardware and software issues, minimizing downtime and ensuring continuous business operations.
- Installed, configured, and maintained operating systems and business applications, ensuring security, performance, and compliance.
- Assisted in designing and implementing network infrastructure, including structured cabling, switch configuration, and connectivity testing.
- Performed routine system health checks and managed data backup processes to safeguard critical organizational information.
- Trained and supported staff through individual and group ICT sessions, improving digital literacy and reducing recurring support requests.
- Maintained ICT service records, technical documentation, and asset inventories to support compliance and efficient service delivery.

Jan 2024 – Mar 2024 (3 Months)
ICT Support Technician (Industrial Attachment) | Newton Institute of Technology

- Supported daily ICT operations in a fast-paced academic institution, gaining hands-on experience in multi-user IT environments.
- Provided first-line technical support to faculty, staff, and students, resolving hardware, software, and network issues efficiently.
- Performed preventive maintenance and troubleshooting of ICT equipment, improving system reliability and extending asset lifespan.
- Maintained accurate ICT asset inventory and documentation to support procurement, tracking, and audit requirements.
- Delivered basic computer literacy training to students and staff, promoting effective use of institutional ICT resources.
- Assisted in maintaining a stable and secure network environment, ensuring reliable connectivity for end users.
- Supported data backup, recovery, and file management to enhance information security and prevent data loss.

Interest & Professional Activities

- Cybersecurity Practice
- Self-Directed Learning
- Community ICT Support

Certification & Professional Developments

Cybersecurity & Information Security (2025)

- Introduction to Cybersecurity | **Cisco**
- Operating Systems and Networking Fundamentals | **Edureka.co**
- Cryptography and Application Security | **Edureka.co**
- Cyber Security Tools **| Edureka.co**
- Web Application Hacking | **Edureka.co**
- Cybersecurity and Ethical Hacking Internship | **Edureka.co**

Python & Data Analytics

- Data Analytics Training| **ICT Authority, Kenya**| 2026
- Introduction to Artificial Intelligence for Teachers and Students | **UNICEF Agora**| 2026
- Python Programming Fundamentals | **Tech Savy Institute** | 2026
- Artificial Intelligence Basic Course | **Dazu AI Hub** | 2025
- Artificial Intelligence Tools, Power BI and Excel | **Exodus Experts** | 2025

Professional Development

- The Psychology of Teamwork | **UoP** | 2026
- Prevention of Sexual Exploitation and Abuse (PSEA) | **UNICEF Agora**| 2026

Jan 2018 – Dec 2021 (4 Years)
ICT Support Volunteer | Pala Sub-County Hospital

Provided end-user ICT support across the administration, records, and finance departments, supporting **25+ staff** and maintaining **8+ workstations** and peripheral devices.

Key Achievements

- Operated and maintained the **NHIF billing system**, generating accurate reports and supporting revenue cycle management and financial compliance.
- Managed electronic patient records and digitized paper-based files, improving data accessibility and retrieval efficiency.
- Performed data entry, verification, and reporting for patient registration, billing, and administrative operations.
- Designed, configured, and maintained the hospital's Wi-Fi network, ensuring secure and reliable connectivity.
- Diagnosed, repaired, and maintained computers, printers, and scanners, minimizing downtime and improving service continuity.
- Trained **25+ staff** on ICT systems and Android devices, enhancing digital literacy and reducing recurring support requests.
- Implemented daily backup procedures for patient records and NHIF data, ensuring data integrity and disaster recovery readiness.
- Enforced ICT security through user access management, antivirus protection, and regular system updates.
- Maintained ICT asset inventories, service logs, and technical documentation to support audits and asset management.
- Managed multiple ICT support tasks independently and collaboratively in a fast-paced healthcare environment..
